### **Moyle Interconnector Access Arrangements approval**

Dear Jody

Please find a "marked-up" and a "clean" revised version of the Moyle Interconnector Access Rules and Charging Methodology Statement.

Following our previous submission of The Access Rules and Charging Methodology Statement on 9<sup>th</sup> July 2012 both documents have been amended to reflect feedback from the Regulatory Authorities received on 7<sup>th</sup> and 17<sup>th</sup> August 2012 and subsequent discussions.

These changes have been made in cooperation with EirGrid to align with the East West Interconnector Access Rules.

The changes to the Moyle Interconnector Access Rules and Charging Methodology Statement are as follows:

#### Moyle Interconnector Access Rules

- D1.0 New: insertion of new rule stating that the capacity made available on the interconnector will be the total technically available interconnector capacity.
- D2.2 Amendment: to clarify that this rule only applies to Long Term and Daily Units.
- D2.5.5 Removed as concept of Preliminary Auction Results does not exist for implicit auctions.
- D2.6.1 Amendment: to clarify that this rule only applies to Long Term and Daily Units.
- D2.6.5 New: insertion of a new rule to clarify that queries relating to Intraday Auctions should be submitted to SEM under the appropriate Trading and Settlement Code provisions.

- D2.7.5 Amendment: to clarify that publications relating to Intraday Auctions are covered in the SEM Trading and Settlement Code.
- D2.10.7 New rule to clarify that rules relating to cancellation, suspension and deferral of Intraday Auctions are covered in the SEM Trading and Settlement Code.
- D5.8.1 Amendment: to clarify that the record of bids will be made available for review by the Regulatory Authorities on request.
- D7.1.1 Amendment: to clarify that Intraday Auctions will be conducted solely in line with the SEM Trading and Settlement code.
- D7.4.3 Amendment: to clarify terminology used to describe offered capacity.
- E2 Amendment: to clarify that this rule only applies to Long Term and Daily Units.
- E5.2 Amendment/New: an amendment and new rules to set out separately and more clearly how UIOSI provisions will be applied in the Daily and Intraday timescales.
- E7 Amendment: updated related definition of NTC reduction to include reference to capacity calculation as suggested.
- E8.4 Amendment: to clarify that no compensation is due in the event of curtailment of capacity acquired in the intraday timeframe.
- E9 Removed: as agreed that this does not belong in the Access Rules.

Schedule 1 – updated definition of “Intraday” to clarify that it starts after EA1 gate closure.  
– updated definition of “NTC” as stated above.

Schedule 10 – updated to clarify that publications relating to Intraday Auctions are covered in the SEM Trading and Settlement Code.

#### Moyle Interconnector Charging Methodology Statement

- 1.1 Amended to refer to licences at both ends of the interconnector.
- 2.6 Amended to state that implicit auction arrangements are set out in SEM Trading and Settlement Code.
- 2.9 Amended to clarify meaning of “in-merit” when determining congestion. Also footnote inserted explaining the purpose of 50% factor being applied in the congestion charge calculation.

2.14 Amended to clarify that no compensation is due in the event of curtailment of capacity acquired in the intraday timeframe.

3.4 Footnote inserted to clarify that BSUOS charges will not apply to interconnector BMUs in future.

We look forward to receiving your approval but in the meantime please do not hesitate to contact me should you wish to discuss.

Yours sincerely
