1. Introduction

The purpose of this paper is to inform market participants of the Directed Contract (DC) subscription dates for DC Rounds 9 to 12. The dates of each primary and supplementary subscription window for DC Rounds 9 to 12 as well as the share of product on offer per round are presented below.

2. Background

Since 1st October 2018 the Northern Ireland Authority for Utility Regulation (NIAUR or Utility Regulator) and the Commission for the Regulation of Utilities (CRU), together referred to as the Regulatory Authorities or RAs, have jointly regulated the all-Island wholesale electricity market known as the Single Electricity Market (SEM) under the new market conditions.

An integral element of the efficient and effective operation of the SEM is risk mitigation by its participants. To date 2-way Contracts for Differences (CfDs) have been offered which have enabled generators and suppliers to manage and hedge the wholesale price risk inherent in the SEM. CfDs assist both wholesale and retail competition to the ultimate benefit of final customers. This is because the ability of generators and suppliers to enter into and access contracts enhances the financial certainty, flexibility and innovation of participants in both the wholesale and retail markets.

DCs are CfDs which are imposed, as appropriate, by the RAs on the incumbent generator - ESB PG - with market power in the SEM as part of the RAs' Market Power Mitigation Strategy.

3. Overview of DC Product Types

There are three DC products in the market: Baseload, Mid-Merit and Peak. Suppliers can elect to subscribe for any given product for which they are eligible in any particular quarter from ESB. The definitions of the products are set out as follows:

- *Baseload Product*: For Trading Periods at the Contract Quantity arising in all hours.
- *Mid-merit Product*: For Trading Periods at the Contract Quantity during the hours beginning at 07:00 and ending at 23:00 on Business Days and for Trading Periods on days that are not Business Days at 80% of the Contract Quantity.
- *Peak Product*: For Trading Periods arising during the hours beginning at 17:00 and ending at 21:00 on all days during October, November, December, January, February and March at the Contract Quantity.

4. DC Approach for 2020

In January 2020, the RAs intend publishing an updated validated SEM PLEXOS model for the period 2019-2025 inclusive. It is the RAs intention that this model will be used for Rounds 9 - 12 of the DCs. The DC subscription windows will continue to be held quarterly, with a 3-day primary subscription window, followed a week later by a supplemental window of 1 day. Four quarters will be offered per round with 25% of each quarter available per round as detailed below in Table 1.

Table 1 - Share of products on offer per round

Round	Q2 20	Q3 20	Q4 20	Q1 21	Q2 21	Q3 21	Q4 21
9	25%	25%	25%	25%	—	—	—
10	—	25%	25%	25%	25%	—	—
11	—	—	25%	25%	25%	25%	—
12	—	—	—	25%	25%	25%	25%

5. DC Timelines for 2020

This section sets out the dates for all primary and supplemental subscription windows for the SEM DC rounds in 2020. The primary subscription window in each DC round is held from Tuesday to Thursday, with the supplemental window taking place the following Thursday. The RAs will endeavour to inform all eligible suppliers of the volumes of DCs they are entitled to at least 5 working days in advance of the start of the primary subscription window. Should there be a need to amend these dates, the RAs will notify stakeholders in advance.

Round 9 DC Subscription – January 2020	Timeline
RAs publish paper on DC quantities and pricing, and inform suppliers of DC eligibility for Q2 2020 to Q1 2021 product	Mid-January
Primary Subscription Window for Q2 2020 to Q1 2021 product	Tues 28 th - Thurs 30 th January
Supplemental Subscription Window	Thurs 6 th February
Round 10 DC Subscription – March 2020	Timeline
RAs publish paper on DC quantities and pricing, and inform suppliers of DC eligibility for Q3 2020 to Q2 2021 product	Mid-March
